## Summary

Software engineer with 4+ years of experience in application development. I have a strong communication, leadership and technical background developing API and migrating to new platforms like AWS. Keeping the business needs in priority, I have led many applications to success.

I love to document my various learning through blogs.

## Experience

### Senior Software Engineer

Cleanilo

Mar 2021 - Sep 2022 (1 year 7 months)

Cleanilo is a leading professional cleaning company offering a wide range of services to keep your home sparkling. It brings both end of the cleaning pipeline together. Over here, my responsibilities build their website from ground up. My achievement over there includes:

- Built the integration of payments across the pipeline
- Spearheaded the project development

### Senior Software Engineer

Hyteno

Nov 2020 - Present (2 years 9 months)

Hyteno provides affordable digital solutions for restaurants to help them grow, and build customer loyalty. It provides many features like unified social media, marketing and website support. My key achievements included:

- Built the entire hyteno backend
- Drive the migration of older hyteno to AWS
- Led the project development
- Scaled project to handle multi country

### Software Engineer

Takeo

Feb 2023 - Apr 2023 (3 months)

TakeoAI is a company in New York, USA that provides bootcamp which guides you to enter to the wild west of software development. The service of takeo crosses international border and is one of the top education providers of bootcamp in the USA and Canada. My responsibilities in Takeo.AI was to build new feature for their registration and take part in key decisions regarding AWS services.

### Software Engineer

Lanceme Up

Jun 2021 - Jan 2022 (8 months)

Lanceme Up is an IT service company at Lalitpur, Nepal. Lanceme Up provides various IT and non IT services to business all around the world. My primary job at Lanceme Up was to help them architect

their backend and system design. I led their migration into AWS, helped them reduced cost of their infrasturcture and mentored junior developers on building new features.

## **Back End Developer**

Softshala Nepal

Apr 2021 - Jan 2022 (10 months)

Softshala Nepal is a digital consulting company and software development firm that builds software solutions for their clients and has in house products as well. In Softshala my responsibilities were to build their video streaming service from scratch and make their share marketing app as fast as possible. Some of the achievements over there were:

- Conceptualized the best way to build their new solution
- Build one of the most performant share market application in Nepal

## **Education**

### **Madan Bhandari Memorial College**

Bsc Csit, Computer Science

2019 - 2023

Studying CS degress has been one of the blessing. It supplies me with a new angle to see all the work I have built. It helped me weigh tradeoff between the various choices that arises during my development.

### **Little Angel College**

10 +2, Physical Sciences

2018 - 2019

Learning physical science and its impact on the world we are living in was felt inspiring to me. I am glad that I learned a lot durijg my days in Little Angel's College

## **Skills**

Amazon Web Services (AWS) • GraphQL • JavaScript • SQL • Node.js • Web Development • Version Control • NoSQL • MongoDB • Django

## **Honors & Awards**

### **Renegade Hackathon - Renegade Insurance**

Dec 2022

### **Ku hackfest 2021 winner - Major League Hacking**
